1. Introduction

Purpose/Aim

Spaghetti Bridge Schools aim to ensure that:

- All risks that may cause injury or harm to staff, students, contractors and visitors are identified, and all control measures that are reasonably practicable are in place to avoid injury or harm
- Risk assessments are conducted and reviewed on a regular basis

The aim of this Policy is to set out the systematic approach for suitable and sufficient risk management throughout our schools.

This policy has regard for ensuring the welfare of staff, students, contractors and visitors at our schools is safeguarded and always promoted, to ensure the school meets its duty to have due regard to the need to prevent people from being drawn into terrorism (the Prevent Duty) by including the risk of radicalisation in the scope of suitable risk assessments and; appropriate action is taken to reduce risks and potential risks that are identified.

- The purpose of risk assessment is to identify hazards and evaluate any associated risks.

- Specific Risk Assessments, which the schools must have in place under current regulations are:
 - Fire Risk
 - First Aid
 - Young workers employed by the school/work experience (under 18 years old)
 - New and expectant mothers
 - Lone working
 - Display screen equipment
 - Working at height
 - Manual handling
 - Asbestos
 - Control of substances hazardous to health
 - Children being drawn into terrorism

The risk assessment shall be 'suitable and sufficient' and cover both employees and non-employees affected by the employer's undertaking (e.g. contractors, members of the public, students, etc.) The term 'suitable and sufficient' is important as it defines the limits of the risk assessment process.

A suitable and sufficient risk assessment should:

- Identify the significant risks and ignore the trivial ones
- Identify and prioritise the measures required to comply with any relevant statutory provisions
- Remain appropriate to the nature of the work and valid over a reasonable period of time
- Identify the risk arising from or in connection with the work.
- The details should be proportionate to the risk.

The significant findings that should be recorded include a detailed statement of the hazards and risks; the preventative, protective or control measures in place; and any further measures to reduce the risks present.

Legal Framework

Documented Risk Assessments are a requirement under the Health & Safety at work Act 1974 and the Management of Health and Safety at Work Regulations 1999 (Amended 2006). Spaghetti Bridge schools are required to assess the risks to the health and safety of our employees and any others who may be affected by the work carried out for the purpose of identifying measures needing to be taken to comply with other legislation. Carrying out these written assessments will help to identify all the protective and preventive measures that must be taken to comply with the Regulations.

Key UK legislation and statutory guidance:

Legislation/Guidance	Requirement & Purpose
----------------------	-----------------------

Health and Safety at Work etc. Act 1974	The overarching UK law that places a duty on employers (the Proprietor) to ensure, so far as is reasonably practicable, the health, safety, and welfare of all employees, and non-employees (pupils and visitors).
The Management of Health and Safety at Work Regulations 1999	Requires employers to make a "suitable and sufficient assessment of the risks" to health and safety (Regulation 3) and imposes specific duties regarding new and expectant mothers.
Education Act 2002, Section 175/157	Places a statutory duty on governing bodies/proprietors to make arrangements to safeguard and promote the welfare of children.
Keeping Children Safe in Education (KCSIE)	Statutory guidance that schools must have regard to, which incorporates risk assessment duties related to safeguarding, including online safety and child-on-child abuse.
The Regulatory Reform (Fire Safety) Order 2005	Requires a dedicated Fire Risk Assessment for the premises.
Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 2013	Governs the statutory requirement for reporting certain accidents and incidents.

2. Scope

Definitions

Risk assessment	A tool for examining the hazards linked to a particular activity or situation, and establishing whether enough precautions have been taken to prevent harm from them based on their likelihood and their potential to cause harm
Hazard	Something with the potential to cause harm to people (such as chemicals or working from height.)
Risk	The chance (high or low) that people could be harmed by hazards, together with an indication of how serious the harm could be
Control measure	Action taken to prevent people being harmed

3. Policy Statement

Types of Risk Assessment

All significant risks shall be assessed, although the principles of assessment remain the same their application can differ. There are 3 recognised methods of assessment:

- A. **Formal** – A written method of evaluating the risk of harm
- B. **Generic** – An evaluation of risk that can be applied to common tasks. In unusual circumstances, when an unforeseen risk presents itself (a previous Formal or Generic risk assessment not having been compiled and/ or in use) an employee may be required to use a dynamic risk assessment.
- C. **Dynamic** – A mental assessment of risk for use when any delay would increase the risk from harm

When assessing risks in our schools, we will follow the process outlined below.

We will also involve staff, where appropriate, to ensure that all possible hazards have been identified and to discuss control measures, following a risk assessment.

- **Step 1: Identify hazards**

We will consider activities, processes and substances within the school and establish what associated hazards could injure or harm the health of staff, students and visitors.

- **Step 2: Decide who may be harmed and how**

For each hazard, we will establish who might be harmed, listing groups rather than individuals. We will bear in mind that some people will have special requirements, for instance students with special educational needs (SEN) and expectant mothers. We will then establish how these groups might be harmed.

- **Step 3: Evaluate the risks and decide on control measures (reviewing existing ones as well)**

We will establish the level of risk posed by each hazard and review existing control measures. We will balance the level of risk against the measures needed to control them and do everything that is reasonably practicable to protect people from harm.

- **Step 4: Record significant findings**

The findings from steps 1-3 will be written up and recorded to produce the risk assessment. A risk assessment template can be found on Bridgelink under Form templates.

- **Step 5: Review the assessment and update, as needed**

We will review our risk assessments, as needed, and the following questions will be asked when doing so:

- Have there been any significant changes?
- Are there improvements that still need to be made?
- Have staff or students spotted a problem?

- Have we learnt anything from accidents or near misses?

Risk assessments will be reviewed frequently (at least annually) and updated, as and when necessary (for example, following an accident, incident or near miss).

- **Step 6: Retaining risk assessments**

Risk assessments are retained for the 3 years after the length of time they apply.

- Risk assessments are securely disposed of.
- Risk assessments are written as needed and reviewed by a member of the senior leadership team.
- On completion of risk assessment and once the content is agreed with the manager it should be uploaded to the relevant folder on shared drives. The Business Manager is responsible for ensuring checks are completed annually on all risk assessments.
- A register of all risk assessments should be completed and maintained by Business Manager
- All risk assessments should be signed by all staff to ensure that they have read and understood them, this is completed via our Bridgelink system.

Mandatory Risk Assessment Areas	Required Clarification
Safeguarding Risks (KCSIE)	Explicitly state that risk assessments must be undertaken to address safeguarding and child protection risks, including online safety (filtering and monitoring), child-on-child abuse, and risks related to extra-familial harms.
Vulnerable Individuals	Specify that risk assessments must consider those who may be especially at risk, including pupils with Special Educational Needs (SEN) or disabilities, and any new or expectant mothers among the staff.
Mandatory Premises Risks	The school will ensure specific statutory risk assessments are completed for: Asbestos, Fire, Legionella, and Control of Substances Hazardous to Health (COSHH).
Working Practices	Assessments are required for all higher-risk activities, including Work at Height and the appropriate level of First Aid provision.

Trips and Outings

- A risk assessment should be completed before any outing and/or trip. This should be reviewed by a member of SLT or an EVC.
- The risk assessment should be completed alongside an outing form completed via Evolve.

4. Roles & Responsibilities

The proprietor

The proprietor (consisting of the Senior Leadership Team and group support) has ultimate responsibility for health and safety matters in Spaghetti Bridge schools but will delegate day-to-day responsibility to the Headteacher and Business Managers.

The proprietor/governance team has a duty to take reasonable steps to ensure that staff and students are not exposed to risks to their health and safety. This applies to activities on or off the school premises.

The proprietor/governance team, as the employer, also has a duty to:

- Assess the risks to staff and others affected by school activities to identify and introduce the health and safety measures necessary to manage the risks
- Inform employees about risks and measures in place to manage them

The headteacher and Senior Leaders

The headteacher is responsible for ensuring that all risk assessments are completed and reviewed.

There is a requirement for all SLT departments to explain to staff how health and safety is managed for their department.

All staff have a responsibility for ensuring risk assessments are completed for their area of work, and the Business Manager should check and monitor assessments.

Spaghetti Bridge schools will implement effective arrangements for consulting with staff (including their union safety representatives, where applicable) on all health and safety matters, including the introduction or review of risk assessments and control measures.

Staff and volunteers

Staff are responsible for:

- Assisting with, and participating in, risk assessment processes, as required
- Familiarising themselves with risk assessments
- Implementing control measures identified in risk assessments
- Alerting the headteacher to any risks they find which need assessing

Students and parents/carers

Students and parents/carers are responsible for following the school's advice in relation to risks, on-site and off-site, and for reporting any hazards to a member of staff.

Contractors

Contractors are expected to provide evidence to the Business Manager that they have adequately risk assessed all their planned work.

5. Support, Advice and Communication

For more support or advice regarding this policy please contact Business Manager, Business Management Support Lead or the Estates, Facilities and Health & Safety team.
